## Samhain Sampler 2011

*This sampler is the very first compilation album put together by the Heathen Harvest webzine.*

*Throughout our years we have always been sure to bring you the most stimulating, original and capable artists from the post-industrial underground. Now we can share some more of what moves us directly with our readers. Our journalists have been hard at work choosing what they consider to be some of the most fitting music at this important turn of the Wheel.*

*The Heathen Harvest Samhain Sampler is a selection of some of the most emotional music to cross our paths recently, as well as some select favourites from years past. The music herein was chosen to adhere to conventional concepts of darkness, in addition to presenting the more challenging, unconventional interpretations. We hope you enjoy this aural voyage of two hours through the underground musical domain.*

This sampler is divided into two distinct sections for consistency of atmosphere.
